

Going to the dentist

This is Buddy.

He helps us look after our teeth and mouth.

What is it like in a
dentists' surgery?

How does a dentist help us?

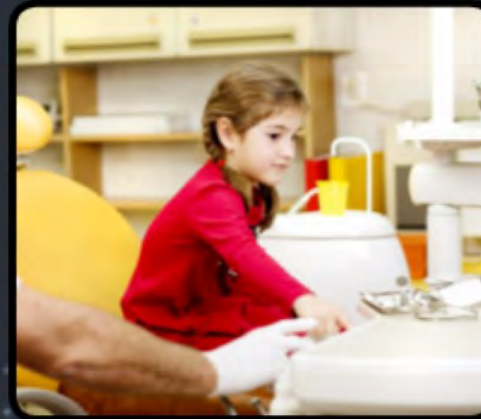

Checks our teeth and mouth are healthy.

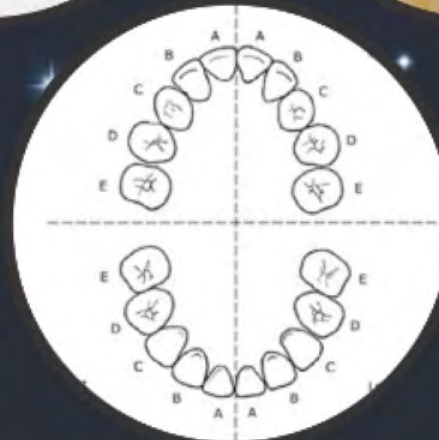

Counts how many teeth we have.

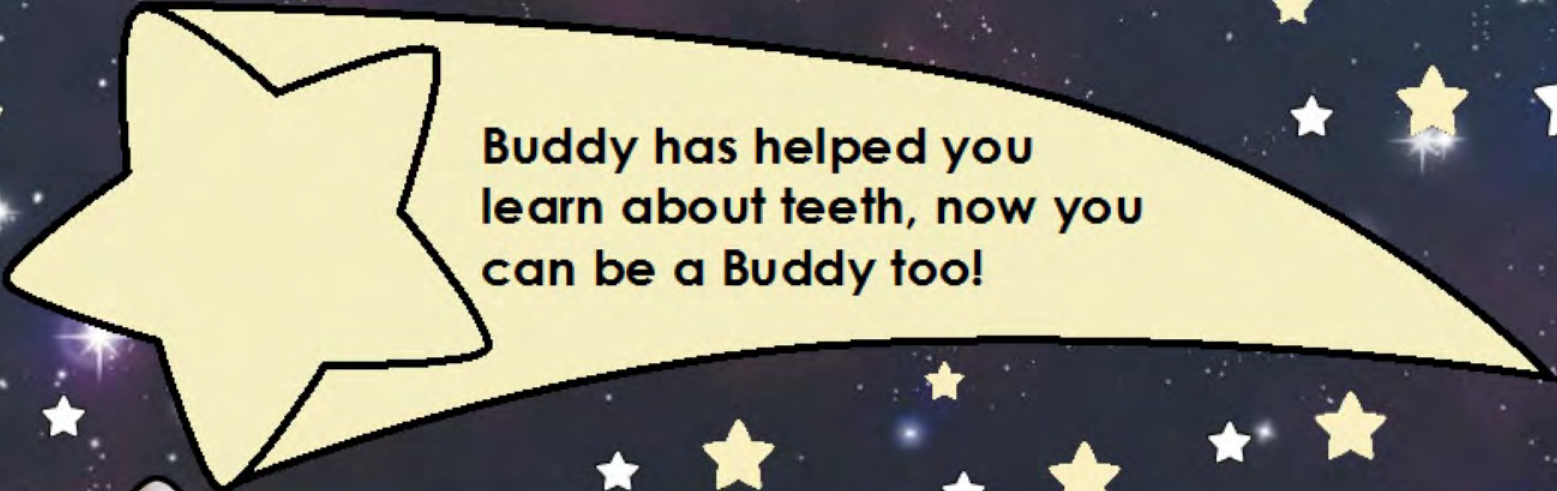

Checks we are brushing our teeth properly.

Visit to the dentist.

The dentist has special toothbrushes
and tools to help them.

Buddy has helped you learn about teeth, now you can be a Buddy too!

Imagine you're now at the dentists. We need a dentist, patient, parent and receptionist.

Who can remember what the dentist does at a check up?
